Hari Nagar, New Delhi | +91 8368802847 | bhavnindersingh27@gmail.com | github.com/Bhavninder | [LinkedIn](#)

PROFESSIONAL SUMMARY

Data-driven professional with 2+ years of experience in business analysis, data analytics, and BI reporting across fintech and content moderation industries. Proficient in SQL, Python, Power BI, and Excel for end-to-end data pipelines, KPI dashboards, and predictive modeling. Currently pursuing MSc Data & Business Analysis; certified Google Data Analytics Professional. Passionate about transforming raw data into strategic business insights.

WORK EXPERIENCE

Business Analyst – S&S Brokerage

Oct 2024 – Sept 2025

Gurugram, India

- Performed market, sales, and client data analysis using SQL, Excel, and Python to identify growth opportunities and performance gaps, directly informing strategic planning.
- Developed Power BI and Excel dashboards to monitor revenue pipeline health, client acquisition trends, and forecasting accuracy for senior leadership.
- Delivered ad hoc data analysis and data-driven insights to C-suite stakeholders, supporting operational and strategic making.
- Analyzed business processes and financial metrics to recommend efficiency improvements, reducing operational costs and improving profitability.
- Translated complex business requirements into analytical reporting solutions, KPI frameworks, and performance

Tools: SQL · Python · Power BI · Excel · Financial Analysis · Stakeholder Reporting

Quality Analyst – Majorel

Jan 2023 – Sept 2024

Waterloo, Ontario, Canada

- Analyzed high-volume moderation datasets (millions of records) using SQL and Excel to identify trends, quality gaps, and policy risk areas.
- Built and maintained Power BI dashboards tracking KPIs including accuracy rates, turnaround time, violation trends, and false positive/negative
- Automated recurring reports and data validation workflows using advanced Excel (Pivot Tables, Macros) and Python scripts, significantly reducing manual effort and error
- Conducted root-cause analysis on moderation errors and automation failures, driving process improvements that enhanced system and reviewer performance.
- Evaluated automated moderation systems and rule-based logic to improve data quality and model effectiveness; partnered with cross-functional teams to translate insights into process improvements.

Tools: SQL · Python · Power BI · Excel (Pivot Tables, Macros) · Data Visualization · KPI

PROJECTS

Air Quality Prediction in Indian Cities [GitHub ↗](#)

Nov 2025

Jaypee Institute of Information

- Collected and integrated AQI and pollutant data from CPCB, OpenAQ, and AccuWeather via web scraping (BeautifulSoup, Selenium); cleaned a dataset of 65,000+ records.
- Conducted EDA using Pandas, Matplotlib, and Seaborn to uncover city-wise and seasonal pollution trends across five major Indian cities.
- Compared Linear Regression ($R^2 = 0.814$) vs. Random Forest Regressor ($R^2 = 0.950$); identified PM2.5 as the most significant AQI predictor — a 17% accuracy improvement.

Tech: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, BeautifulSoup, Jupyter Notebook

HR Analytics – Compensation Analytics [GitHub ↗](#)

Dec 2024

Jaypee Institute of Information

- Analyzed a 3,500+ record Data Science salaries dataset to uncover compensation trends across job roles, experience levels, and geographies using Python and Excel.
- Performed statistical analysis and EDA including salary distribution, role-based benchmarking, and remote work impact — delivering actionable insights for HR strategy.

- Built Excel dashboards with Pivot Tables and cleaned/transformed data for analytical readiness, simulating real-world HR compensation reporting

Tech: Python, Pandas, NumPy, Matplotlib, Excel (Pivot Tables, Power Query), Jupyter Notebook

Stock Price Trend Analysis & Visualization [GitHub ↗](#)

Nov 2025

Jaypee Institute of Information

- Imported and transformed Bank NIFTY historical stock data; computed daily, weekly, and monthly returns to trace volatility clusters in BFSI stocks.
- Applied SMA 20/50 moving averages and rolling standard deviation to identify trend shifts and risk periods; built ARIMA forecasting model for short-term directional price
- Created interactive candlestick charts and comparative financial visualizations using ggplot2 and Plotly for executive-level market interpretation.

Tech: R, quantmod, tidyquant, dplyr, ggplot2, Plotly, xts, TTR, forecast, lubridate

EDUCATION

MSc Data and Business Analysis – [Jaypee Institute of Information Technology](#)

Jul 2025 – Present

Honors BSc – Computer Science – [Lakehead University](#)

Jan 2017 – Sept 2022

CERTIFICATIONS

Google Data Analytics Professional Certificate – Google (9 Courses: SQL, Tableau, R, EDA, Capstone)

Jul 2025

Cloud Computing Training Program – C-DAC Noida (IaaS, PaaS, SaaS, Cloud Security)

Feb 2026

TECHNICAL SKILLS

Programming: Python, R, SQL, Java, C++

Data Analytics: EDA, Data Cleaning, Feature Engineering, Statistical Analysis, HR

Machine Learning: Regression, Random Forest, K-Means, K-NN, Naïve Bayes, ARIMA

BI & Visualization: Power BI (DAX, Power Query), Advanced Excel (Pivot Tables, Macros, Dashboards)

Databases: MySQL, SQL Querying, Data Warehousing

Cloud & Big Data: AWS, Hadoop

Business Tools: SAP (Basics), Salesforce, ERP Systems
